

5 Stage / 50 gallon per day undersink Reverse Osmosis Drinking Water System

Are you spending \$.99 to \$1.50 per 20 oz. bottle of drinking water at the convenience store?

Are you tired of running out of bottle water?

Are you tired of loading cases of heavy bottle water in your car every time you travel to the grocery store?

Do you really know the quality of your store bottled water?

Is the water you are purchasing, pure clean water, free of contaminants, or just water that meets minimum standards.

If your answer is yes to any of these questions, **PURE WATER, Inc.** has your solution.

Let us show you!

The Under-Sink PURE WATER Reverse Osmosis Cooking and Drinking Water System

- Mounts under the kitchen sink
- Permanent touch flow faucet mounted at the sink for cooking and drinking.
- Manufactures up to 50 gallons of the highest quality contaminant free water per day.
- 50 gallons of pure, clean, contaminant free drinking water available for your cooking and drinking needs each day.

Choose your Filtration System:
5 stage Reverse Osmosis
or 5 stage Ultra Filtration

Benefit Comparison

Contaminant	Reverse Osmosis	Ultra Filtration
sediment, dirt	✓	✓
chlorine, taste & odor*	✓	✓
Trihalomethanes* (THM's)	✓	✓
hardness & total dissolved solids	✓	
Biological Contaminants		
bacteria & virus	✓	✓
Inorganic Chemicals:		
Lead and Arsenic	✓	
Copper, mercury, fluoride	✓	
Nitrates, nitrites	✓	
Chromium 6	✓	
Volatile organic chemicals:		
Pesticides, atrazine, benzene*	✓	✓
MTBE*	✓	✓
Other:		
Sodium and Radium 226/228 radon	✓	
Water source must meet EPA standards for potable water. RO systems require drain.		
*Removed by carbon filter
