

Inconsistent water usage combined with strict route schedules can leave you frustrated. Either you're faced with running out of water, or too much water.

And changing a heavy 40-pound bottle can be a real challenge!

The inside of a cooler is the perfect environment for bacteria, algae and even viruses to thrive. The

setting is wet, warm and dark - just the right conditions to promote their growth.

Even if your bottle water was of the highest quality when it left the bottler, there is no guarantee that its quality has not deteriorated prior to your use.

pure water's **REVERSE OSMOSIS DRINKING WATER SYSTEMS** by **HYDRAQUEST™**

**HOT & COLD REVERSE OSMOSIS
DRINKING WATER SYSTEMS**

Most people choose bottled water for two reasons: convenience and concern over the quality of tap water.

But is bottled water REALLY convenient? Is it REALLY good quality? And, did you know that you are probably paying more for a gallon of bottled water than you pay for a gallon of gasoline?

If you want real convenience and **GUARANTEED** quality for a fraction of bottled water cost, then HydraQuest is for you.

Added Convenience for Your Office

- ◆ Large supply of high quality pure drinking water
- ◆ Substantial savings over bottled water delivery
- ◆ No more bottle storage
- ◆ No more lifting of heavy bottles
- ◆ Hot and Cold dispensers
- ◆ Inline UV (Ultra Violet) Lamp kills bacteria
- ◆ Filters up to 98.5% of all contaminants

Inconvenient

Bottles to change, store and interrupted supply

"Open-loop" system is subject to possible contamination

Your cost for cooler rental, storage space for bottles, labor to change the bottles and the water itself can bring your actual cost **TO MORE THAN \$2 PER GALLON**

Convenient

Bottle-free so you're never out of water

"Closed-loop" system guarantees quality

HydraQuest delivers 500 gallons of water per week. Plus it eliminates storage space and labor costs - while giving you the best water available for **PENNIES PER GALLON**

5 Stage Reverse Osmosis Drink Water System

Benefit Comparison

Contaminant	Reverse Osmosis
sediment, dirt	✓
chlorine, taste & odor*	✓
Trihalomethanes* (THM's)	✓
hardness & total dissolved solids	✓

Biological Contaminants

bacteria & virus	✓
------------------	---

Inorganic Chemicals:

Lead and Arsenic	✓
Copper, mercury, fluoride	✓
Nitrates, nitrites	✓
Chromium 6	✓
